Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to grow the most profitable crop. • I need reliable crop recommendations. • I want to avoid crop failure.	THINKS • Which crop is best for my soil? • Will the weather affect my yield? • Can technology help me make better decisions?
PERSONA NAME <i>(Farmer)</i>	
DOES • Tests soil properties . • Checks weather forecasts. • Uses the OptiCrop recommendation system before planting.	FEELS • Confused by changing weather conditions. • Worried about low crop yield and financial loss. • Confident after receiving AI-based crop recommendations.
